

Please support xm. I have been a customer for 1 year and it is great. I drive a truck and it is outstanding to go from coast to coast without losing the channel i am listening to. I also listen to it now in my home and in my personal vehicles when i am home. I cant wait until they get local traffic and weather for the indianapolis area. Please reject NAB's petition 04-160 and support the radio of the future XM.
